

Agent-Led & Expert-Validated Cloud Security Remediation

Your CNAPP Finds the Problems. Tamnoon Fixes Them

Tamnoon automatically prioritizes alerts into actionable initiatives, investigates root causes, and generates safe, expert-validated remediation plans your team can execute at scale.

Agent-Led & Expert-Validated Cloud Remediation

Safely remediate at cloud speed with Tami, our AI agent trained on 2M+ real-world remediation scenarios. Every action is expert-validated before it touches production.

TMN-00071 - AWS MFA not enabled for IAM users

Priority = Medium

Start Date Sept 15, 2025

How Tamnoon Enables Safe Remediation

- 1

Connect & Verify

Tami connects to your cloud detection tools, maps assets, and validates existing security controls.
- 2

Prioritize & Triage

Alerts are deduplicated, grouped into initiatives, and ranked by business impact and asset value.
- 3

Remediate

Tami generates step-by-step playbooks. Your team executes with confidence using your existing tools.
- 4

Approve & Investigate

Your team greenlights initiatives. Tami investigates each one and delivers a full impact analysis.

Integration Partners

Group Your Alert Backlog Into Prioritized Initiatives

Tami maps your environment, crown jewels, and asset ownership to group related alerts into initiatives tailored to what's actually happening in your cloud. Each initiative is ranked, assigned, and ready to execute.

Automatically Investigate Every Initiative

Once approved, Tami runs deep investigations using the full context of your environment. You get a clear impact analysis showing what's safe to remediate, what needs coordination, and exactly what to do next.

Get Remediation Playbooks Built for Your Cloud

Tami generates custom playbooks, complete with step-by-step instructions, code snippets, and rollback procedures. Every action is logged with a timeline of who did what so your team can collaborate directly within each initiative.

Prove Your Cloud Security is Improving

Gain real-time visibility into what's getting fixed, how fast, and what's left. Track exposure trends, MTTR, remediation velocity, and outcomes-focused metrics that make security's impact clear to leadership.

What Tamnoon Delivers

97%

Exposure reduction in 90 days

6M

"Tamnoon's AI platform investigates and proposes detailed remediation plans with all the required context. As they say, it does what it says on the tin."

Danilo Nogueira
VP Cybersecurity & Compliance

Fix What Your CNAPP Finds

Tamnoon finishes what CNAPPs start. Our platform delivers battle-tested remediation at machine speed, safely resolving vulnerabilities and misconfigurations while dramatically reducing friction between cloud security and development teams.
